

GURU PRASAD

Senior Full Stack Developer | MERN · Next.js · NestJS · Micro-Frontend · Web3

guruprasadregar1@gmail.com | +91 63785 26193 | [LinkedIn Profile](#) | Jaipur, India | Open to Relocation: EU / UAE

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with 4.5+ years of experience building scalable, production-grade web applications for international clients. Deep expertise in the MERN stack, Next.js, NestJS, and micro-frontend architecture. Proven track record delivering AI chat platforms, NFT/blockchain solutions, e-commerce platforms, and real-time applications — including projects live in the UK, EU, and US markets. Experienced in client-facing roles, Agile delivery, cloud deployments (AWS), and mentoring junior engineers. Actively expanding expertise in Go (Gin framework). Seeking a challenging senior role in EU or UAE.

WORK EXPERIENCE

Senior Full Stack Developer (MERN) | Dotsquares Technologies Pvt. Ltd., Jaipur, India *Oct 2022 – Present*

- Architected and delivered 8+ full-stack web applications for international clients across e-commerce, blockchain, e-learning, beauty-tech, and AI domains using React, Next.js, Angular, Node.js, NestJS, and MongoDB/PostgreSQL.
- Designed and implemented micro-frontend architecture patterns to support modular, independently deployable front-end applications — reducing release cycle times and improving team scalability.
- Built a real-time AI chat platform (ChatGPT-like) using React, Redux, Python, and LLM APIs, integrating streaming responses and conversation history management.
- Developed and deployed NFT/blockchain platforms (NakaToken, Loud Market, Digital Title) with Web3 API integration, wallet connectivity, and on-chain transaction handling.
- Integrated multiple payment gateways — Stripe, PayPal, Cryptomus, Coingate — into production e-commerce and marketplace platforms serving global users.
- Managed end-to-end AWS deployments (EC2, S3) including server configuration, CI/CD pipelines, and post-release monitoring across all projects.
- Communicated directly with international clients (UK, US, EU) to gather requirements, present demos, and iterate rapidly on feedback — maintaining strong client relationships.
- Mentored 3 junior developers, conducted code reviews, and enforced coding standards for performance, security, and maintainability.
- Currently learning Go (Gin framework) to expand into high-performance backend services.

TECHNICAL SKILLS

Frontend	React.js, Redux, Next.js, Angular, Micro-Frontend Architecture, HTML5, CSS3, Bootstrap, Responsive Design
Backend	Node.js, Express.js, NestJS, RESTful API Design, MVC Architecture, WebSockets (Real-time)
Databases	MongoDB, PostgreSQL, MySQL
Cloud & DevOps	AWS (EC2, S3), Application Deployment, Server Management, GitHub, Bitbucket
Blockchain & Web3	Web3 API Integration, NFT Platform Development, Blockchain Application Architecture
Payments	Stripe, PayPal, Cryptomus, Coingate
Languages	JavaScript (ES6+), TypeScript, Go (Gin – Learning)
Tools	Postman, Linux, Windows

KEY PROJECTS

Advanced AI Chat Platform

Role: Frontend / AI Integration

React.js, Redux, Python, LLM APIs — ChatGPT-like platform with real-time streaming, multi-turn conversation management, and custom UI components.

NakaToken — NFT & Blockchain

Role: Full Stack Developer

React.js, Node.js, Express.js, MongoDB, Web3 — Full NFT marketplace with wallet integration, on-chain asset management, and blockchain transaction handling.

Endless Domains — Digital Assets

Role: Full Stack Developer

Next.js, NestJS, PostgreSQL, Blockchain, AWS — Domain/digital asset trading platform with complex state management and cloud infrastructure.

Henri-Lloyd — E-commerce

Role: Frontend Developer

React.js, Redux, Algolia — Global premium brand e-commerce platform with advanced search, product filtering, and cart/checkout flows.

LearnIIPlus — E-Learning

Role: Full Stack Developer

React.js, Node.js, MongoDB, MySQL, Laravel — UK-based e-learning platform with course management, student progress tracking, and payment integration.

MyBeautySquad — Mobile & Web

Role: Full Stack Developer

React.js, Angular, Node.js, MongoDB — Booking and marketplace platform for beauty professionals with admin dashboard and mobile-responsive web app.

Loud Market — NFT Marketplace

Role: Full Stack Developer

React.js, Node.js, Angular, MongoDB, Blockchain — Multi-chain NFT trading platform with auction mechanics and wallet connectivity.

Digital Title Platform

Role: Full Stack Developer

React.js, Node.js, Express.js, MongoDB, Blockchain — Blockchain-based digital ownership and title registry system.

EDUCATION

Master of Computer Applications (MCA)

2021

Compucom Institute of Technology & Management, Jaipur, India

Bachelor of Computer Applications (BCA)

2016

LBS College, Jaipur, India
